

JUNE 2017 - ADVISORY COMMENTARY

AS WE CELEBRATE THE DOW JONES INDUSTRIAL AVERAGE, S&P 500 & NASDAQ COMPOSITE INDEXES CHARGING TO ALL-TIME HIGHS, IT FEELS APPROPRIATE TO TAKE NOTE OF SEVERAL LESS THAN POSITIVE FACTS THAT INVESTORS MAY OR MAY NOT CHOOSE TO FOCUS ON. SO, WITH AN EYE TOWARDS A MORE RATIONAL OPTIMISM, WE PRESENT THE FOLLOWING ITEMS WITHOUT COMMENT:

-U.S. DURABLE GOODS ORDERS ARE UNCHANGED SINCE MAY 2013. THE DOW JONES INDUSTRIAL AVERAGE IS UP 5000 POINTS SINCE THEN. S&P 500 TOTAL PROFITS ARE THE SAME AS IN 2012, YET THE INDEX IS UP OVER 70% SINCE THEN.

-THE TRAILING 12-MONTH P/E RATIO FOR THE S&P 500 IS 21.9. THIS IS 31% ABOVE THE 10-YEAR AVERAGE OF 16.7. THE FORWARD 12-MONTH P/E RATIO FOR THE S&P 500 IS 17.7. THIS IS 26% ABOVE THE 10-YEAR AVERAGE OF 14.0.

-AT THE END OF FY 2006, U.S. GROSS FEDERAL DEBT TOTALED JUST OVER \$8.5 TRILLION, WITH AN ANNUAL INTEREST COST OF \$405 BILLION.

-AT THE END OF FY 2016, U.S. GROSS FEDERAL DEBT TOTALED JUST OVER \$19.5 TRILLION, WITH AN ANNUAL INTEREST COST OF ONLY \$432 BILLION.

-THE WILSHIRE 5000 MARKET CAP TO GDP RATIO (A LONG-TERM VALUATION INDICATOR FAVORED BY WARREN BUFFETT) CURRENTLY SITS AT 127.6%. THE ONLY HIGHER READINGS WERE SET AT 136.5% AT THE HEIGHT OF THE DOT-COM BUBBLE BACK IN 2000.

-THE SHILLER CAPE RATIO (A CYCLICALLY ADJUSTED P/E RATIO) NOW SITS AT 29.86. THIS IS THE HIGHEST READING FOR THE RATIO SINCE THE 2000 DOT-COM BUBBLE TOP, AND A READING NEARLY IDENTICAL TO THE SECOND HIGHEST EVER, THAT OF THE MARKET'S "BLACK TUESDAY" TOP IN 1929.

-AS OF JANUARY, THE EUROPEAN UNION BANKING SYSTEM HAS 1.06 TRILLION EUROS OF NON-PERFORMING LOANS. THIS REPRESENTS 5.4% OF ITS TOTAL LOANS, WHICH IS ROUGHLY 3X THE AMOUNT IN THE U.S. BANKING SYSTEM. (FINANCIAL TIMES, 1/30/17)

SINCERELY,

BRIAN WECKMAN, RFC
CHIEF INVESTMENT OFFICER
ACTIS WEALTH MANAGEMENT L.C.

The Standard & Poor's 500 Index is a capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Dow Jones Industrial Average is the most widely used indicator of the overall condition of the stock market, a price-weighted average of 30 actively traded blue chip stocks, primarily industrials. The 30 stocks are chosen by the editors of the Wall Street Journal. The Dow is computed using a price-weighted indexing system, rather than the more common market cap-weighted indexing system.

The NASDAQ Global Market Composite consists of 1,450 stocks that meet NASDAQ's strict financial and liquidity requirements, and corporate governance standards. The Global Market Composite is less exclusive than the Global Select Market Composite.

The Russell 3000 Index is a market capitalization weighted equity index maintained by the Russell Investment Group that seeks to be a benchmark of the entire U.S. stock market. More specifically, this index encompasses the 3,000 largest U.S.-traded stocks, in which the underlying companies are all incorporated in the U.S.

The CBOE SPX Market Volatility Index shows the market's expectation of 30-day volatility. It is constructed using the implied volatilities of a wide range of S&P 500 index options. This volatility is meant to be forward looking and is calculated from both calls and puts. The VIX is a widely used measure of market risk and is often referred to as the "investor fear gauge."

The Barclays US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency).

The Barclays US 7-10 Year Treasury Bond Index measures the performance of U.S. Treasury securities that have a remaining maturity of at least seven years and less than 10 years.

The S&P GSCI is recognized as a leading measure of general price movements and inflation in the world economy. The index – representing market beta – is world-production weighted. It is designed to be investable by including the most liquid commodity futures, and provides diversification with low correlations to other asset classes.

The GSCI West Texas Intermediate Excess Return Index reflects the returns that are potentially available through an unleveraged investment in the West Texas Intermediate (WTI) crude oil futures contract plus the Treasury Bill rate of interest that could be earned on funds committed to the trading of the underlying contracts.

The U.S. Dollar Index is a measure of the value of the U.S. dollar relative to majority of its most significant trading partners. This index is similar to other trade-weighted indexes, which also use the exchange rates from the same major currencies.

Gold Spot refers to the price paid for current delivery of 1 ounce of physical gold.

The Dow Jones Composite REIT Index contains all publicly traded U.S. REITs in the S&P Dow Jones Indices U.S. stock universe that are classified into one of three subcategories—equity, mortgage or hybrid—as defined by the REIT/RESI Industry Classification Hierarchy.

The CBOE S&P 500 BuyWrite Index (BXM) is a benchmark index designed to track the performance of a hypothetical buy-write strategy on the S&P 500 Index.
