# LOOKING FORWARD...

INTERNATIONAL EVENTS HAVE BEGUN TO TAKE OVER THE FINANCIAL HEADLINES. THE MONTH OF JUNE ENDED WITH A MASSIVE 31% JUMP IN VOLATILITY DUE TO THE CRISIS IN GREECE COMING TO A HEAD. THE POTENTIAL DEFAULT OF PUERTO RICO IS ALSO BEGINNING TO BREED SOME TURMOIL IN THE CREDIT MARKETS. AN 11% SLIDE IN THE CHINESE SHANGHAI STOCK EXCHANGE INDEX IN JUST THE MONTH OF JUNE IS CAUSING A LOT OF DISCUSSION ABOUT THE FRAGILITY OF CHINA'S FINANCIAL SYSTEM. WHILE THE OVERALL STOCK MARKET IS STILL DUE FOR A PULLBACK, IT'S YET TO BE SEEN WHETHER THESE EVENTS WILL BE THE CATALYST FOR A CORRECTION IN THE BROADER MARKETS WORLDWIDE.

ONE POSITIVE NOTE UNDERLYING ALL OF THE INTERNATIONAL TURMOIL IS HOW RELATIVELY ATTRACTIVE IT MAKES OUR DOMESTIC MARKETS LOOK TO FRAZZLED FOREIGN INVESTORS. WHILE FOREIGN INFLOWS OF INVESTMENT INTO THE U.S. WILL GENERALLY EXACERBATE THE "STRONG DOLLAR" PROBLEM, IT ALSO PROVIDES A BOOST TO OUR EQUITY AND REAL ESTATE MARKETS. THIS TYPE OF MOVEMENT COULD ALSO PROVE BENEFICIAL IN KEEPING OUR INTEREST RATES DOWN, AS FOREIGN INVESTORS OFTEN RUN FOR SAFETY IN U.S. TREASURY BONDS.

THE UPCOMING EARNINGS SEASON WILL BE VERY TELLING OF THE EXTENT TO WHICH THE STRONG DOLLAR AND INTERNATIONAL VOLATILITY IS TAKING ITS TOLL ON U.S. COMPANIES. JUST LIKE MANY FIRMS BLAMED THE POOR WINTER WEATHER FOR THEIR RECENT UNDERPERFORMANCE, WE MAY SEE THE SAME STATEMENTS SHIFTED SLIGHTLY TOWARDS "CURRENCY HEADWINDS" THAT ARE DRAGGING DOWN SOME CORPORATE BOTTOM LINES.

AT THE MIDPOINT OF 2015, WE CONTINUE TO BE CAUTIOUS AS WE NAVIGATE WHAT IS PROVING TO BE A VERY VOLATILE AND, OVERALL, VERY FLAT YEAR FOR MARKET RETURNS.

SINCERELY,

BRIAN WECKMAN, RFC  
CHIEF INVESTMENT OFFICER  
ACTIS WEALTH MANAGEMENT L.C.

The Standard & Poor's 500 Index is a capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Dow Jones Industrial Average is the most widely used indicator of the overall condition of the stock market, a price-weighted average of 30 actively traded blue chip stocks, primarily industrials. The 30 stocks are chosen by the editors of the Wall Street Journal. The Dow is computed using a price-weighted indexing system, rather than the more common market cap-weighted indexing system.

The NASDAQ Global Market Composite consists of 1,450 stocks that meet NASDAQ's strict financial and liquidity requirements, and corporate governance standards. The Global Market Composite is less exclusive than the Global Select Market Composite.

The Russell 3000 Index is a market capitalization weighted equity index maintained by the Russell Investment Group that seeks to be a benchmark of the entire U.S. stock market. More specifically, this index encompasses the 3,000 largest U.S.-traded stocks, in which the underlying companies are all incorporated in the U.S.

The CBOE SPX Market Volatility Index shows the market's expectation of 30-day volatility. It is constructed using the implied volatilities of a wide range of S&P 500 index options. This volatility is meant to be forward looking and is calculated from both calls and puts. The VIX is a widely used measure of market risk and is often referred to as the "investor fear gauge."

The Barclays US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency).

The Barclays US 7-10 Year Treasury Bond Index measures the performance of U.S. Treasury securities that have a remaining maturity of at least seven years and less than 10 years.

The S&P GSCI is recognized as a leading measure of general price movements and inflation in the world economy. The index – representing market beta – is world-production weighted. It is designed to be investable by including the most liquid commodity futures, and provides diversification with low correlations to other asset classes.

The GSCI West Texas Intermediate Excess Return Index reflects the returns that are potentially available through an unleveraged investment in the West Texas Intermediate (WTI) crude oil futures contract plus the Treasury Bill rate of interest that could be earned on funds committed to the trading of the underlying contracts.

The U.S. Dollar Index is a measure of the value of the U.S. dollar relative to majority of its most significant trading partners. This index is similar to other trade-weighted indexes, which also use the exchange rates from the same major currencies.

Gold Spot refers to the price paid for current delivery of 1 ounce of physical gold.

The Dow Jones Composite REIT Index contains all publicly traded U.S. REITs in the S&P Dow Jones Indices U.S. stock universe that are classified into one of three subcategories—equity, mortgage or hybrid—as defined by the REIT/RESI Industry Classification Hierarchy.

The CBOE S&P 500 BuyWrite Index (BXM) is a benchmark index designed to track the performance of a hypothetical buy-write strategy on the S&P 500 Index.
