

OCTOBER 2016 - ADVISORY COMMENTARY

WITH THE MARKETS ENDING THE MONTH AND QUARTER ON A POSITIVE NOTE, SEPTEMBER ALSO SAW THE EMERGENCE OF SEVERAL ECONOMIC INDICATORS FLASHING SLOWER GROWTH SIGNALS, WITH SOME DOWNRIGHT NEGATIVE TRENDS SHOWING UP IN THE DATA AS WELL. WE'RE NOW BEGINNING TO SEE ACROSS THE BOARD REDUCTIONS IN GDP GROWTH ESTIMATES FROM BOTH PRIVATE AND PUBLIC FORECASTERS.

THE U.S. FEDERAL RESERVE IS STILL WORKING INSIDE A VERY SMALL, VERY CLAUSTROPHOBIC BOX OF OPTIONS. THEY, ALONG WITH OURSELVES, BELIEVE THAT INTEREST RATES SHOULD BE AT A MUCH MORE NORMAL LEVEL GIVEN HOW FAR WE ARE FROM THE LAST ECONOMIC DOWNTURN. THE QUESTION IS NOW EMERGING, ON AN OFFICIAL SCALE, OF WHAT DOES THE FED DO IF THE ECONOMY'S PROGRESS IS NOT SUFFICIENT ENOUGH TO HANDLE THOSE HIGHER RATES?

JANET YELLEN, THE CHAIRMAN OF THE FEDERAL RESERVE BOARD, SUGGESTED THAT THE FED COULD LOOK AT PURCHASING SHARES OF INDIVIDUAL COMPANIES, OR THE BROADER INDEXES, IN ORDER TO SUPPORT THE ECONOMY. ONE NOW HAS TO OPENLY WONDER IF THE PEOPLE RUNNING THIS INSTITUTION HAVE EVER EVEN BREEZED CASUALLY OVER THE ECONOMIC HISTORY OF THE MODERN WORLD? THE IDEA OF THE CENTRAL BANK OF THE UNITED STATES OF AMERICA, THE MOST FREE-MARKET AND CAPITALIST NATION IN HUMAN HISTORY, BUYING AN OWNERSHIP AND VOTING STAKE IN PRIVATE AMERICAN COMPANIES IS ONE OF THE MOST ABHORRENT ECONOMIC IDEAS WE CAN THINK OF. BUT, THEN AGAIN, WITH WHAT WE'VE SEEN OUR INSTITUTIONS DO OVER THE PAST NINE YEARS, WHO WOULD REALLY BE THAT SURPRISED?

IT TRULY IS A SIGN OF HOW POORLY THE PREVIOUS ACTIONS HAVE WORKED, THAT THEY ARE NOW OPENLY CONSIDERING THIS TYPE OF ECONOMIC GAMBIT. ONE CAN ONLY GUESS HOW THE STORY WOULD ULTIMATELY UNFOLD, BUT WE KNOW THAT IT WILL END BADLY.

REMEMBER, THE FIRST RULE OF GETTING YOURSELF OUT OF A HOLE IS TO **STOP DIGGING!**

SINCERELY,

BRIAN WECKMAN, RFC
CHIEF INVESTMENT OFFICER
ACTIS WEALTH MANAGEMENT L.C.

The Standard & Poor's 500 Index is a capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Dow Jones Industrial Average is the most widely used indicator of the overall condition of the stock market, a price-weighted average of 30 actively traded blue chip stocks, primarily industrials. The 30 stocks are chosen by the editors of the Wall Street Journal. The Dow is computed using a price-weighted indexing system, rather than the more common market cap-weighted indexing system.

The NASDAQ Global Market Composite consists of 1,450 stocks that meet NASDAQ's strict financial and liquidity requirements, and corporate governance standards. The Global Market Composite is less exclusive than the Global Select Market Composite.

The Russell 3000 Index is a market capitalization weighted equity index maintained by the Russell Investment Group that seeks to be a benchmark of the entire U.S. stock market. More specifically, this index encompasses the 3,000 largest U.S.-traded stocks, in which the underlying companies are all incorporated in the U.S.

The CBOE SPX Market Volatility Index shows the market's expectation of 30-day volatility. It is constructed using the implied volatilities of a wide range of S&P 500 index options. This volatility is meant to be forward looking and is calculated from both calls and puts. The VIX is a widely used measure of market risk and is often referred to as the "investor fear gauge."

The Barclays US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency).

The Barclays US 7-10 Year Treasury Bond Index measures the performance of U.S. Treasury securities that have a remaining maturity of at least seven years and less than 10 years.

The S&P GSCI is recognized as a leading measure of general price movements and inflation in the world economy. The index – representing market beta – is world-production weighted. It is designed to be investable by including the most liquid commodity futures, and provides diversification with low correlations to other asset classes.

The GSCI West Texas Intermediate Excess Return Index reflects the returns that are potentially available through an unleveraged investment in the West Texas Intermediate (WTI) crude oil futures contract plus the Treasury Bill rate of interest that could be earned on funds committed to the trading of the underlying contracts.

The U.S. Dollar Index is a measure of the value of the U.S. dollar relative to majority of its most significant trading partners. This index is similar to other trade-weighted indexes, which also use the exchange rates from the same major currencies.

Gold Spot refers to the price paid for current delivery of 1 ounce of physical gold.

The Dow Jones Composite REIT Index contains all publicly traded U.S. REITs in the S&P Dow Jones Indices U.S. stock universe that are classified into one of three subcategories—equity, mortgage or hybrid—as defined by the REIT/RESI Industry Classification Hierarchy.

The CBOE S&P 500 BuyWrite Index (BXM) is a benchmark index designed to track the performance of a hypothetical buy-write strategy on the S&P 500 Index.
