

## MAY 2016 - ADVISORY COMMENTARY

THE OVERALL MARKETS ENDED THE MONTH OF APRIL WITH NOT MUCH OVERALL CHANGE, OTHER THAN THE NASDAQ POSTING A 1.94% DROP. THE ONE SOURCE OF DECISIVE MOVEMENT WAS THE OIL MARKET. WEST TEXAS CRUDE OIL FINISHED APRIL WITH AN IMPRESSIVE 16.03% GAIN. THIS CONSIDERABLE RECOVERY WILL CONTINUE TO SHORE THINGS UP IN THE OIL PATCH AND LIKELY AID S&P 500 EARNINGS AS WE MOVE THROUGH THE REMAINDER OF THE YEAR, GIVEN THE ALMOST CONSTANT NEGATIVE IT'S BEEN OVER THE PAST 18-24 MONTHS.

WITH THE S&P 500 ABOUT 2% AWAY FROM NEW HIGHS, THE OVERWHELMING SENTIMENT IS STILL RATHER DOOR. THE RECENTLY RELEASED BARRON'S BIG MONEY POLL FOUND ONLY 38% OF MONEY MANAGERS WERE BULLISH OR VERY BULLISH. THIS WAS DOWN FROM 55% LAST FALL AND 45% A YEAR AGO. IN FACT, THIS WAS ONE OF THE LOWEST READINGS IN THE POLL'S MORE THAN 20-YEAR HISTORY. THE TWO BIGGEST WORRIES ARE EARNINGS DISAPPOINTMENTS AND AN ECONOMIC SLOWDOWN.

ON AN INTERNATIONAL NOTE, EARNINGS IN EUROPE ARE FALLING SHARPLY. STOXX 600 EARNINGS ARE EXPECTED TO DROP 18% YEAR OVER YEAR (THOMSON CONSENSUS), WHICH IS DUE TO MORE THAN JUST ENERGY. PERFORMANCE IN FINANCIALS AND CONSUMER EARNINGS HAS ALSO BEEN DISAPPOINTING. UNTIL EARNINGS STABILIZE IN THE REGION, WE BELIEVE IT WILL BE DIFFICULT FOR EUROPEAN STOCKS TO PRODUCE A SUSTAINED PERIOD OF OUTPERFORMANCE SO WE REMAIN CAUTIOUS ON DEVELOPED FOREIGN MARKETS MOVING FORWARD. EMERGING MARKETS, AS VOLATILE AS THEY HAVE BEEN RECENTLY, STILL CONTINUE TO SEEM MORE ATTRACTIVE FROM A RISK/REWARD STANDPOINT.

WHILE MOST OF OUR HOLDINGS ARE STRADDLING "UNCHANGED" FOR THE YEAR SO FAR, WE HAVE SEEN DISTINCT OUTPERFORMANCE FROM OUR FLOATING-RATE BOND ALLOCATION, AS WELL AS FROM THE VALUE STOCK SECTOR. WE CONTINUE TO BELIEVE THAT IT WILL BE HARD FOR THE MARKETS TO PUSH FORWARD WITHOUT A LARGE CATALYST OF SOME KIND.

SINCERELY,

BRIAN WECKMAN, RFC  
CHIEF INVESTMENT OFFICER  
ACTIS WEALTH MANAGEMENT L.C.

The Standard & Poor's 500 Index is a capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Dow Jones Industrial Average is the most widely used indicator of the overall condition of the stock market, a price-weighted average of 30 actively traded blue chip stocks, primarily industrials. The 30 stocks are chosen by the editors of the Wall Street Journal. The Dow is computed using a price-weighted indexing system, rather than the more common market cap-weighted indexing system.

The NASDAQ Global Market Composite consists of 1,450 stocks that meet NASDAQ's strict financial and liquidity requirements, and corporate governance standards. The Global Market Composite is less exclusive than the Global Select Market Composite.

The Russell 3000 Index is a market capitalization weighted equity index maintained by the Russell Investment Group that seeks to be a benchmark of the entire U.S. stock market. More specifically, this index encompasses the 3,000 largest U.S.-traded stocks, in which the underlying companies are all incorporated in the U.S.

The CBOE SPX Market Volatility Index shows the market's expectation of 30-day volatility. It is constructed using the implied volatilities of a wide range of S&P 500 index options. This volatility is meant to be forward looking and is calculated from both calls and puts. The VIX is a widely used measure of market risk and is often referred to as the "investor fear gauge."

The Barclays US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency).

The Barclays US 7-10 Year Treasury Bond Index measures the performance of U.S. Treasury securities that have a remaining maturity of at least seven years and less than 10 years.

The S&P GSCI is recognized as a leading measure of general price movements and inflation in the world economy. The index – representing market beta – is world-production weighted. It is designed to be investable by including the most liquid commodity futures, and provides diversification with low correlations to other asset classes.

The GSCI West Texas Intermediate Excess Return Index reflects the returns that are potentially available through an unleveraged investment in the West Texas Intermediate (WTI) crude oil futures contract plus the Treasury Bill rate of interest that could be earned on funds committed to the trading of the underlying contracts.

The U.S. Dollar Index is a measure of the value of the U.S. dollar relative to majority of its most significant trading partners. This index is similar to other trade-weighted indexes, which also use the exchange rates from the same major currencies.

Gold Spot refers to the price paid for current delivery of 1 ounce of physical gold.

The Dow Jones Composite REIT Index contains all publicly traded U.S. REITs in the S&P Dow Jones Indices U.S. stock universe that are classified into one of three subcategories—equity, mortgage or hybrid—as defined by the REIT/RESI Industry Classification Hierarchy.

The CBOE S&P 500 BuyWrite Index (BXM) is a benchmark index designed to track the performance of a hypothetical buy-write strategy on the S&P 500 Index.
