

JULY 2016 - ADVISORY COMMENTARY

WELL, IF “BREXIT” WASN’T A PART OF YOUR INVESTING VOCABULARY BEFORE, IT CERTAINLY WAS BY THE TIME THE MONTH OF JUNE WAS OVER. ON JUNE 23RD, THE CITIZENS OF THE UNITED KINGDOM VOTED TO LEAVE THE EUROPEAN UNION IN A REFERENDUM THAT SENT AN ELECTRIC SHOCK THROUGH THE WORLD’S MARKETS. WHILE THE U.K.’S ACTUAL LEAVING OF THE E.U. WON’T LIKELY HAPPEN FOR TWO YEARS, THE PROSPECT OF THIS EVENTUALITY PUT A SOLID DOSE OF “RISK-OFF” INTO INVESTORS’ PSYCHE.

THE BRITISH POUND SAW A JAW-DROPPING FALL OF 10.8% IN THE DAYS FOLLOWING THE REFERENDUM. THIS TYPE OF CURRENCY MOVEMENT WILL CONTINUE TO INJECT UNCERTAINTY INTO THE INVESTMENT LANDSCAPE AS WE MOVE FORWARD.

WHILE THE SHORT-TERM VOLATILITY & NEGATIVITY CAUSED BY THIS EVENT IS OBVIOUSLY A LARGE CONCERN, IT IS IMPORTANT TO ALWAYS LOOK AT THE OTHER SIDE OF THE COIN WHEN THESE TYPES OF EVENTS OCCUR. THE EUROPEAN UNION HAS BEEN IN A SERIOUS ECONOMIC MALAISE SINCE THE FINANCIAL CRISIS OF 2008-09 AND HAS DONE LITTLE TO REFORM ITS POLITICAL AND ECONOMIC SYSTEM OF REGULATION SINCE THEN. THIS LACK OF REFORM, AND A SENSE OF A LACK OF INPUT OR CONTROL, WAS A LARGE PART OF THE BRITISH PEOPLE’S RATIONALE BEHIND THEIR DESIRE TO LEAVE THE E.U.

THE NET RESULT OF THIS REFERENDUM COULD LIKELY BE A MORE COMPETITIVE ECONOMY IN THE UNITED KINGDOM THAT MAY THEREFORE PUSH THE EUROPEAN UNION TO ADOPT A MORE MARKET-ORIENTED ECONOMIC FRAMEWORK TO COMPETE WITH THEIR OFFSHORE NEIGHBORS. ONLY TIME WILL TELL, BUT UP UNTIL NOW, THE E.U.’S LEADERS HAVE NOT BEEN SEEN AS WANTING TO PUSH THEIR ECONOMIES TOWARDS ANY SUBSTANTIAL MARKET-BASED REFORMS. THIS TYPE OF POLICY-MAKING HAS SEEN THEM BOUNCE FROM CRISIS TO CRISIS (GREECE, RUSSIA, SYRIA) WITH FEW POSITIVE OUTCOMES.

GIVEN THE LIKELY CONTINUATION OF THIS VOLATILITY, WE WILL REMAIN MODERATELY ALLOCATED TO THE MARKETS WITH SUBSTANTIAL POSITIONS IN NON-EQUITY HOLDINGS, UNTIL WE SEE MORE PRUDENT GROWTH OPPORTUNITIES PRESENT THEMSELVES.

SINCERELY,

BRIAN WECKMAN, RFC
CHIEF INVESTMENT OFFICER
ACTIS WEALTH MANAGEMENT L.C.

JUNE 2016 - MARKET UPDATE

EQUITY MARKETS

The Standard & Poor's 500 Index is a capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Dow Jones Industrial Average is the most widely used indicator of the overall condition of the stock market, a price-weighted average of 30 actively traded blue chip stocks, primarily industrials. The 30 stocks are chosen by the editors of the Wall Street Journal. The Dow is computed using a price-weighted indexing system, rather than the more common market cap-weighted indexing system.

The NASDAQ Global Market Composite consists of 1,450 stocks that meet NASDAQ's strict financial and liquidity requirements, and corporate governance standards. The Global Market Composite is less exclusive than the Global Select Market Composite.

The Russell 3000 Index is a market capitalization weighted equity index maintained by the Russell Investment Group that seeks to be a benchmark of the entire U.S. stock market. More specifically, this index encompasses the 3,000 largest U.S.-traded stocks, in which the underlying companies are all incorporated in the U.S.

The CBOE SPX Market Volatility Index shows the market's expectation of 30-day volatility. It is constructed using the implied volatilities of a wide range of S&P 500 index options. This volatility is meant to be forward looking and is calculated from both calls and puts. The VIX is a widely used measure of market risk and is often referred to as the "investor fear gauge."

The Barclays US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency).

The Barclays US 7-10 Year Treasury Bond Index measures the performance of U.S. Treasury securities that have a remaining maturity of at least seven years and less than 10 years.

The S&P GSCI is recognized as a leading measure of general price movements and inflation in the world economy. The index – representing market beta – is world-production weighted. It is designed to be investable by including the most liquid commodity futures, and provides diversification with low correlations to other asset classes.

The GSCI West Texas Intermediate Excess Return Index reflects the returns that are potentially available through an unleveraged investment in the West Texas Intermediate (WTI) crude oil futures contract plus the Treasury Bill rate of interest that could be earned on funds committed to the trading of the underlying contracts.

The U.S. Dollar Index is a measure of the value of the U.S. dollar relative to majority of its most significant trading partners. This index is similar to other trade-weighted indexes, which also use the exchange rates from the same major currencies.

Gold Spot refers to the price paid for current delivery of 1 ounce of physical gold.

The Dow Jones Composite REIT Index contains all publicly traded U.S. REITs in the S&P Dow Jones Indices U.S. stock universe that are classified into one of three subcategories—equity, mortgage or hybrid—as defined by the REIT/RESI Industry Classification Hierarchy.

The CBOE S&P 500 BuyWrite Index (BXM) is a benchmark index designed to track the performance of a hypothetical buy-write strategy on the S&P 500 Index.
